

Sharing content wirelessly from your laptop (for best results use a laptop)

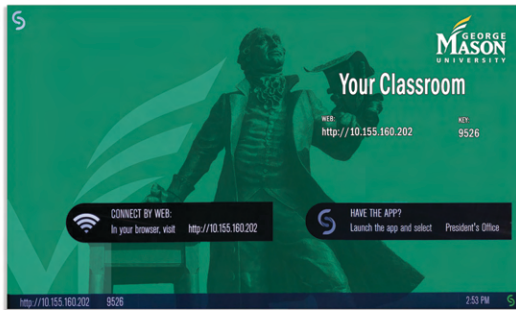

BEFORE YOU BEGIN...

- (1) **Connect** to the “Eduroam” wireless network
- (2) Use the touch panel to **Select** “Wireless” as your desired source

For Apple devices: Follow Steps 1 and 2, then use Screen Mirroring to share content

1

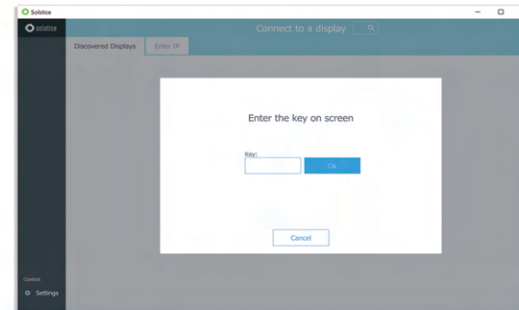

First time users:

Open your internet browser
Connect to the IP address
displayed on the screen
Choose “Get the App & Join”
Run the app once it has downloaded

2

After Launching the App:

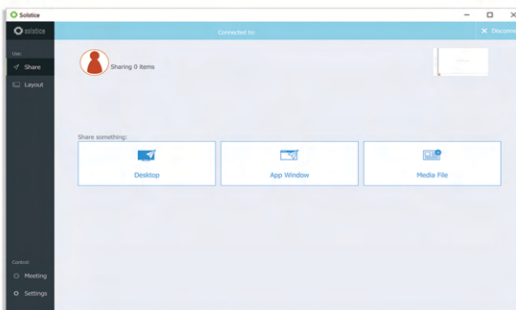

Choose the “Enter IP” tab and
enter the IP address displayed
Enter the 4 digit “key” code displayed
on the screen when requested
(Note: code refreshes each time you disconnect)

You are now connected!

If you have previously connected to a
room it will be listed in the
Discovered Displays tab.

3

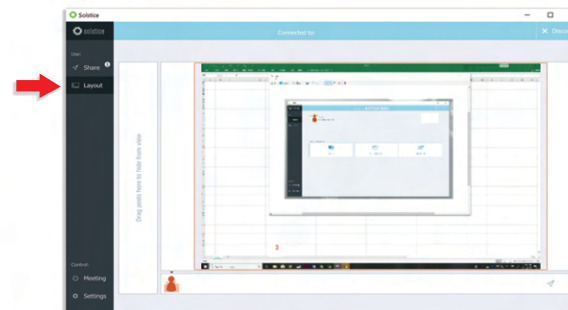

Sharing Options:

Share your desktop
Share an active application
(i.e. PowerPoint)
Share a media file that
you have saved on your laptop

4

Layout Options:

Arrange shared files and/or screens
inside the app by choosing the
Layout option, located on the left
side of the application window

Up to **4 users** can be connected to share at any one time

TO RESTRICT ACCESS...

Go to the “Meeting” option (lower left corner of app) and then choose the “Moderate” tab

TO STOP SHARING...

Select the “Disconnect” button to ensure that your sharing session is terminated.
